

Vision PowerPack for Blade Center Express Resilience

Fast, Easy and Effective Clustering for Your Blade Center

In today's nonstop marketplace, business and technology leaders understand the critical role information availability plays throughout the enterprise. When systems fail, operations grind to a halt and business performance suffers.

The Vision PowerPack for Blade Center Express Resilience is a customized offering that brings you full featured clustering, scaled and optimized for your Blade Center Express environment. Now you can get nonstop, automated protection that keeps your servers working hard for your business with innovative features that save you time, money and labor.

Robein Bank Gains Customer Trust

ROBEIN BANK

"With EchoCluster, we expect a higher availability of our ICT capabilities. It will allow the Bank to offer more services and continuity to our clients."

– Ad Boumans, ICT Manager, Robein Bank

The Express Option for Blade Center Resilience

This unique PowerPack provides everything you need to keep your business up and running through continuous server monitoring and immediate, automated failover.

- Continuous monitoring and automatic failover delivers 24/7 error-free availability without the time or expense of manual IT labor.
- Cluster "heartbeat" server-status communications via a dedicated Ethernet connection for assured, continuous communications even during heavy network traffic.
- All aspects of failover performed automatically in only seconds including dismount of storage, IP address switching, remount and application startup.
- Individual applications can be separately failed over without disturbing other applications for faster, more efficient recovery.
- Smart network connection management automatically re-routes network connections during communication failures to avoid unnecessary failovers.
- Fast, point-and-click switching enables you to easily move users to an alternate server while you perform maintenance on the primary server.

Vision Solutions. Easy. Affordable. Innovative.

Vision Solutions is a leading provider of high availability, disaster recovery and data management solutions for IBM Power Systems (IBM i and AIX). Affordable and easy to use, Vision products ensure business continuity, increase productivity, reduce operating costs and satisfy compliance requirements.

As IBM's largest high availability Premier Business Partner, Vision Solutions oversees a global network of business partners and services and support professionals to help you achieve your business goals.
