

Vision Replicate1 Quick Start

Sharing data between disparate databases, incompatible applications and various platforms is one of the biggest challenges posed by enterprise computing. Replicate1 software from Vision Solutions shatters compatibility barriers and makes it easy to capture, replicate, transform and share information throughout the enterprise. Vision's Replicate1 Quick Start service provides expert assistance with the installation of Replicate1, as well as its configuration, and training.

Today we bring best-of breed applications and platforms into the enterprise that are best suited to specific tasks. IT managers know that somehow they must ensure that these systems can talk to each other. The fast track to near-universal data sharing, greater productivity, higher profitability and immediate ROI is Replicate1 Quick Start.

Vision's Replicate1 Quick Start service encompasses three important phases:

- First, Vision technicians conduct a project-planning workshop to review your requirements and objectives.
- Next, with your assistance, Vision's technicians will install, configure and audit Replicate1 for data sharing between any two servers running operating systems supported by Replicate1.
- Finally, as part of this service, Vision technicians will guide you and your staff as you learn to use the features and functions of Replicate1, including the Replicate1 console for model building and data movement and control.

This Quick Start service will provide up to a total of 40-hours effort from one or more Vision experts, to be delivered on a mutually agreeable schedule.
